ELECTION SECURITY AND GOVERNMENT AFFAIRS WITH DR. LAURA PRESSLEY

DECEMBER 5, 2023 @ 6:30 - 8:00 PM

**JOHNSON COUNTY REPUBLICAN PARTY HEADQUARTERS
210 S. MAIN ST., CLEBURNE, TX 76033**

Laura Pressley, Ph.D.
Principal · True Texas Elections, LLC

Dr. Pressley is first and foremost a Christian. Her research interests include electronic voting system technology, computerized voting tabulation processes and security, statistical analysis of electronic voting results, central counting station central accumulator audit logs, along with the study of state and federal election laws associated with the storage of backup records for elections.

In 2018, Dr. Pressley founded True Texas Elections, LLC to address how our votes are counted. She has given over 500 presentations across Texas on the technical details of how Texas' electronic voting machines, and Texas' election officials around the state, are not adhering to state laws regarding retention of election records and counting of votes.

Since 2016, she has trained over 600 central counting station election watchers, election judges, and clerks in more than 45 counties in Texas. In 2020, the Trump National Campaign chose True Texas Elections to train, place and debrief their central counting station watchers in Texas in over 38 counties for the November election.

Dr. Pressley has been a court authorized voting system data auditor testifying expert, consulting expert, and witness in several election related criminal and legal cases in Texas. She has testified before the Texas Senate and House on election security and technology issues and has drafted legislation that has become law in 2021 and 2023 in Texas.

Dr. Pressley's technology background includes a Ph.D. in Physical Chemistry from U.T. Austin in 1994 and working professionally as a senior member technical staff and an engineering manager for 17 years in the Austin semiconductor industry. She also holds 4 United States patents on semiconductor device technology and has authored and co-authored peer reviewed publications on the same. She has appeared on the Roger Stone's Stone Cold Truth radio show, and many others.
